201 CMR 17.00 Compliance

Mobius Works, as your IT provider, has always kept the security of your data and password information under the highest level of cryptographic encryption. In compliance with the new data protection law that will become effective in Massachusetts as of March, 1 2010 we offer this letter as part of your compliance. You are required to keep letters of this nature on file for each vendor that has access to your data and passwords. If you require any assistance in complying with the new law Mobius Works can assist you as we have for many of our clients.

Mobius Works is in full compliance with all the requirements of 201 CMR 17.00 as of the effective date. Any data that is removed from your building is stored in compliance with the new law and any documentation on passwords or access is stored and protected with the latest security protocols. While the law has been made to enforce this it has been our practice all along. We utilize secure SSL email on all internal communications and all our data files reside behind redundant firewalls that meet the requirements of the law.

Thank, You,

A handwritten signature in black ink, appearing to read "Ed Watson", written over a horizontal line.

Ed Watson
